Harshjot Singh

OG-LORD-RK

Education

Guru Nanak Dev University, Amritsar
Bachelor of Technology in Computer Science

August 2023 - May 2027
Amritsar, Punjab

Relevant Coursework

- Computer Networks
- Operating Systems
- Information Security
- Cryptography Basics

Technical Skills

Operating Systems : Linux (Kali Linux, Arch Linux), Windows

Programming : Python, Bash, Java / Kotlin

Networking : TCP/IP, DNS, VPN, Network analysis

Security Tools : Wireshark, Nmap, Burp Suite (learning)

System Tools : Zsh, Systemd, Syncthing, ProtonVPN, GParted

Interests

Cybersecurity

Network Security

Privacy Engineering

Linux System Internals

Projects

Android Tracker Detection App

Android application designed to detect nearby **Bluetooth Low Energy tracking devices** used for unauthorized surveillance.

Features:

- BLE scanning
- Tracker behavior detection
- Persistent monitoring
- Privacy alerts

Technologies:

Android BLE Kotlin/Java

Linux Host Intrusion Detection System

Lightweight Linux monitoring tool detecting suspicious activity.

Features:

- Authentication log monitoring
- Brute-force login detection
- Suspicious process detection
- Alert generation

Technologies:

Python Linux logs Bash

PGP-Based Secure Messaging Platform

Implemented digital signature verification to ensure message authenticity and prevent tampering.

- Developed a secure messaging application using client-side PGP encryption and a self-hostable relay server.
- Implemented cryptographic identity verification using public-key fingerprints and QR-based contact exchange.
- Designed mechanisms to mitigate man-in-the-middle attacks and ensure encrypted message delivery.

Technologies:

Python PGP Encryption FastAPI Cryptographic Hashing Secure Messaging Architecture
