

Harshjot Singh

Cybersecurity & Linux Enthusiast

og.lord.rk@proton.me — +91 76966-06490 — LinkedIn — GitHub

Summary

Cybersecurity and Linux enthusiast with hands-on experience in Kali Linux, previous Arch Linux system customization, and deep understanding of Linux internals including boot processes, init systems, filesystem structure, and system-level configuration. Interested in security research, offensive security, infrastructure hardening, and low-level system behavior.

Skills

Operating Systems: Kali Linux, Arch Linux

Programming Languages: C++, Java, Python, Basic C

Security Tools: Nmap, Aircrack-ng, Wireshark

Networking: TCP/IP, HTTP/HTTPS, DNS, SSH, Network Protocol Fundamentals

Linux & Systems: Linux Internals, System Configuration, Filesystem Structure, Init Systems, Boot Process, Terminal-based Workflows

Development Tools: Git, Neovim

Hardware & Embedded: ESP32, Hardware Prototyping, Embedded System Experimentation

Technical Projects

PGP Privacy Communication Application

Python, WebSockets, Cryptography

- Developed terminal-based privacy-focused communication application with encrypted messaging
- Implemented identity/key management and encrypted client-side storage workflows
- Built WebSocket-based communication and message routing architecture
- Designed secure relay/server communication handling for message exchange

Linux Host Intrusion Detection System

Python, Linux Security Monitoring

- Developed Linux-based host intrusion detection system for monitoring security events
- Implemented authentication log analysis and brute-force login detection mechanisms
- Built suspicious process monitoring and anomaly detection workflows
- Worked with Linux system logs and process-level security monitoring

Android BLE Tracker Detection System

Android, Bluetooth Low Energy (BLE)

- Developing Android-based BLE tracker detection and nearby device awareness system
- Implemented Bluetooth Low Energy scanning and persistent device detection workflows
- Built proximity and detection-duration tracking for nearby BLE devices
- Focused on privacy-oriented mobile security and unknown tracker detection use-cases

Education

Bachelor of Technology in Computer Science and Engineering

Guru Nanak Dev University, Amritsar

2023 – 2027
